

Flat anti vibration mounts for machinery

LA ROSI®

Main features

Flat anti-vibration mounts for machinery (SUFIPA) are devices designed to absorb shocks and limit end-of-stroke movement, reducing vibrations and noise. Made from high-quality natural rubber with galvanized steel reinforcements, they offer excellent strength and durability. Ideal for industrial machinery, transport systems, and mechanical applications, they guarantee protection and stability. Available in different sizes and hardnesses, they adapt to various needs, with a practical and robust design.

With a flat and compact structure, these mounts offer effective isolation from oscillations, ensuring stability and protection for both machines and support surfaces. Made from high-quality materials, SUFIPA mounts are a versatile solution for improving performance in industrial environments.

PART Nr.	TYPE	Hardness Shore	A (mm)	B (mm)	C (mm)	D (mm)	E (mm)	øF	øG	H (mm)	LOAD (daN)
